

# Business and Technology Roadmap

*Don't miss the forest for the trees.*

## Overview

Concurrency works with business and/or technical decision makers to align IT and business strategies. Our process helps organizations leverage IT to drive progress in the organization. By aligning strategies, we can help **drive business progress** (such as support for new products) while also **transforming IT departments** from cost centers to **valuable assets** within their organizations.

We work as partners with our clients to enable change at a people-level, as well as at a technology-level. The tools we apply lead to real savings and deliver direct business value. Depending on the need, we frame the conversation as either “all up” or focused on a specific area of need. In either case, the results include a thorough analysis of business problems and opportunities, as well as a documented technology roadmap.

## Consulting Services

- Business and technology experts, working with our mature framework for evaluating systems and processes
- Definition of what's leading edge, standardized, and trailing
- An analysis of systems, integrations, workflows, IT practices and other factors specific to the client's organizations

## Associated Technology

- SharePoint
- Dynamics CRM
- System Center
- Skype for Business
- Power BI & SQL Server
- Azure
- Office 365

Real Microsoft expertise. Real business value.
