

Modern Identity

Greater security for controlling data, applications and devices.

Overview

Concurrency uses native Microsoft solutions that allow organizations to use existing Windows Active Directory credentials to provide and control access to services—providing a modern simple user experience and enhancing security for company data. We have deep Microsoft expertise and the ability to integrate solutions across clients' systems and services, both on-premises and in the cloud using Azure Active Directory. **Our team is unique in that we have both development and infrastructure identity experience.** Benefits include enhanced security and centralized tools for managing access from multiple types of devices.

Client projects often include one or more of the following: Mobile Device Management (MDM), Data Protection at file level (RMS, IRM), Mobile App Management (MAM), Multi-Factor Authentication (MFA,2FA), Single Sign-On to Applications, Self-Service Password Reset.

Consulting Services
