

# Azure Cloud and Hybrid Datacenter

*Flexible IT infrastructure that can scale on demand.*

## Overview

Concurrency understands the challenges of creating a cloud consistent platform. We understand “born-in-the-cloud” applications as well as the hybrid infrastructure and how to make an on-premises environment function like a cloud deployment through Microsoft datacenter technologies and tools like System Center. These capabilities combine with our team of Microsoft MVPs to **create an end-to-end understanding of the public, private, and hybrid cloud ecosystem.**

We have deep experience in defining an organization’s Azure topology, both for Infrastructure-as-a-Service and Platform-as-a-Service technologies. We have strength in infrastructure and development technologies in the Azure space, as well as a deep understanding of hybrid cloud services.

## Consulting Services

- Assessing business needs and Azure capabilities
- Educating on Azure topologies and technologies
- Determining measurable value for short term wins
- Azure subscription cost optimization
- Migration strategy

## Associated Technology

- Azure Site Recovery
- Azure Backup
- Azure IaaS
- Azure PaaS
- System Center
